

Conversation Topics for Safety Practices Online:

- What personal information can I share online?
- What apps are we comfortable using and why?
- What are some pros/cons of each?
- How can I use this website in a healthy way?
- What are my favorite websites to visit?
- What are some pros/cons of each?
- How can I use this website in a healthy way?

Possible Scenarios:

You are on your favorite app looking at your friend's profile when you get a message request from a cute guy/girl who you don't know, what do you do?

You are in a gaming chat when one of your teammates starts paying you a lot of attention. They message you privately, sending game tokens to you but one day they start asking you vaguely sexual questions or making comments about sex.

Your boyfriend/girlfriend asks you for a sexy/nude photo. You don't really want to, but they say how hot you are and how happy it will make them. Because you figure everyone else is doing it anyway and you love this person you do it. 2 months later you break up, you receive a text from them saying "I want \$100 or I'm leaking your photo online."

What is your safety plan of action if or when this happens?
